

Call for papers

Other Education –the journal of educational alternatives is an online open access journal dedicated to developing and expanding vital conversations about education. Our focus is what schools ignore, leave out and what nation states deny are needful or valid educational methods, approaches and philosophies.

We seek work - engaged with educational and inter/cross-disciplinary conversations - that can offer challenge and stimulation to the question: "What is education?"

Go to www.othereducation.org to read more about the remit of the journal, see who is on our international editorial board...

...and sign into the journal to make a submission.

Publication is January and July of each year. Get your paper to us. Prepare for it to be read widely. Choose *Other Education* as the venue for your work's release because we matter and so do you. We seek to change (not improve) education and your work matters to achieve this. Join the debates.

Please blind your article carefully for peer review if an academic paper.

We also publish various non peer reviewed short forms of other contributions to the field, as well as book reviews. Get in touch with the editor or book reviews editor directly for these.

Other Education is currently a platinum journal without gold APCs or green waits. We reserve the right to ask for gold APCs where institutionally appropriate.
